KOUEGOUE NANA WILFRIED

Network Administration & Security | IT Audit | Cybersecurity

Douala, Cameroon | +237 677 960 923 / +237 641 132 018 | kouegouenanawilfried237@gmail.com
LinkedIn: linkedin.com/in/kouegoue-nana-wilfried-637170429

PROFESSIONAL SUMMARY

Network Administration and Security graduate with hands-on experience in telecom infrastructure, network administration, and cybersecurity. Currently completing a practical internship at Matrix Telecom, with experience configuring MikroTik routers, M3/M5 wireless radios, and ONU equipment, performing OTDR-based fiber testing, fiber fault localization, and fusion splicing. Strong foundation in network security, Windows Server, VLANs, DHCP, traffic analysis, vulnerability assessment, and Python scripting. Interested in IT audit, IT controls, cybersecurity, technology risk, and network security.

CORE COMPETENCIES

IT Audit & Cybersecurity:	Security controls, vulnerability assessment, network security, traffic analysis, technical documentation
Network Administration:	MikroTik, IP addressing, subnetting, VLANs, DHCP, routing fundamentals, network troubleshooting
Telecom & Fiber Optics:	M3/M5 wireless radios, ONU configuration, OTDR testing, fiber fault localization, fusion splicing
Security Tools:	Nmap, Wireshark, Metasploit, Hydra, John the Ripper, Kali Linux
Systems & Virtualization:	Windows Server, Cisco Packet Tracer, GNS3, VirtualBox, VMware
Programming & Scripting:	Python scripting and automation, Bash basics

PROFESSIONAL EXPERIENCE

Network & Telecom Intern — Matrix Telecom, Douala
2026 – Present

- Configure MikroTik routers across different models and port configurations for network connectivity and customer infrastructure.
- Configure M3/M5 wireless radio stations and work with bandwidth and wireless link parameters.
- Configure ONU (Optical Network Unit) equipment used for customer fiber connections.
- Use an OTDR (Optical Time-Domain Reflectometer) to test fiber links and assist in locating faults and signal-loss points.
- Perform and assist with fiber-optic fusion splicing and fiber link restoration.
- Participated in a field intervention following a fiber-optic cable rupture, including fault localization, fiber fusion, and post-repair verification.

Cybersecurity Intern — G&C Creative Technology, Douala
2025

- Developed Python scripts for automation and basic cybersecurity tasks.
- Performed network traffic analysis using Wireshark and conducted network scanning and vulnerability assessments using Nmap.
- Practiced ethical hacking and security testing in controlled lab environments using Kali Linux and security tools.
- Completed practical cybersecurity exercises on Hack The Box and TryHackMe.

Network & Security Intern — Matrix Telecom, Douala
2023 – 2024

- Deployed and configured DHCP services in Windows Server and Cisco Packet Tracer environments.
- Managed IP addressing and allocation for more than 200 devices; applied subnetting and VLAN segmentation.
- Created network documentation and infrastructure diagrams.

EDUCATION

Bachelor's Degree in Network Administration & Security
Institut Universitaire du Golfe de Guinée (IUG), Douala | 2025

Higher National Diploma (HND) in Network Admin & Security
Institut Universitaire du Golfe de Guinée (IUG), Douala | 2024

GCE Advanced Level & Ordinary Level
Government Bilingual High School Ngodi Bakoko | 2023 / 2020

PROJECTS & INTERESTS

Cybersecurity Assistant: Developed a Python/Tkinter tool integrating network traffic capture, Nmap scanning, and security automation.

Network Security Labs: Practiced Windows Server, Active Directory, VLANs, DHCP, DNS, FortiGate, and Zabbix in lab environments.

Languages & Interests: English (Fluent), French (Fluent) | IT Audit, IT Risk & Controls, Cybersecurity, Telecom, Security Monitoring.
